

Flexible levels of support

- Full Wet-Lab Training support with models*, prepared specimens and technicians to run the stations.
- Rent only the technician for \$500 per day plus expenses when you need an experienced lab tech to man your stations. You supply the models and specimens.

* Models include the basic mounts, tubs and basins required to perform procedures. More sophisticated models, such as those available from "Limbs & Things" are also available for a rental fee, or supply your own model.

Wet-Lab Demonstrations of Surgical Instruments and Equipment Grab Attention and Promote Sales!

We've been providing surgical laboratory training for many years which has included animal labs, human cadaver specimens and inanimate animal "parts". These have generally been part of larger educational programs for Universities, Individual hospitals and medical societies or organizations. After repeated requests from the medical industry we're making many of these inanimate models and specimens available on a contract basis, for use by your own sales and training people.

Pig Bladders being prepared for Urology and Gynecology Training

Residency training

Teaching Hospitals and Residency programs can enhance your programs by incorporating organized wet-lab training with hands-on practice on inanimate, animal specimens, or human cadaver

Colposcopy Residency Training at Michigan State

models. These can simulate the eye-hand coordination that is required for various medical/surgical procedures.

These include labs for cystoscopy, colposcopy, laparoscopy, hysteroscopy, GI endoscopy, bronchoscopy,

arthroscopy, Oral-Maxillofacial, ENT, Podiatry, Ophthalmology, Dermatology, and any Laser Procedure.

RENT THE TECHNICIAN

Sometimes you just need an experienced Lab Tech to man your own stations in order to free up your staff or salespeople for more important functions. You supply all your models and specimens, we'll rent you the tech for \$500/day plus travel expenses.
